Kenya a **country** in the **continent** of Africa.

Timeline

1804	First steam train built by George Stephenson.
1885	Invention of the car by Karl Benz.
1903	First flight .
1904	First train to travel at more than 100MPH.
1933	Electric and diesel trains.
Now	Tilting trains.

Key Concepts/Features

Travel has developed and changed over the years through **inventors** designing a product to fill a need. We can travel on land, water, air and space using different forms of transport.

Maps show that the world is split into seven continents and five oceans. Countries closer to the **equator** are hotter whereas **countries** closer to the polar regions are cooler. This affects the climate and weather patterns for all countries.

Compass directions (North, South, East and West) and directional language to describe the location features on a map.

Basic symbols are used to construct a simple map to represent an area.
