

Croxby Primary Academy – Enhanced Resource Provision

At Croxby Primary Academy, our aim is to nurture success in all our pupils. In order to do this, we recognise that our pupils are individuals and that some may need an alternative approach to support them to achieve.

With this in mind, we have developed our Enhanced Resource Provision to support pupils who may need greater social and emotional support. We believe in the philosophy that children learn best when they have good levels of self-esteem, a sense of belonging and resilience, this is what we hope to achieve through our Enhanced Resource Provision.

What is an ERP?

An ERP is a facility in mainstream schools, with additional funding, to build up expertise and resources, in order to work with pupils with high level needs, who may live outside the area normally served by the academy. The ERP at Croxby is being developed over time to provide for pupils with severe and complex special educational needs, who require a level of specialist support which may not normally be available in mainstream schools.

Aims of the ERP

These are our key aims for providing our enhanced provision;

- To help pupils increase their self-esteem, confidence and resilience.
- To support pupils' academic progress and learning.
- To support the development of pupils' positive relationships with adults and peers.
- To develop pupils' feeling of belonging to the school by providing a place in which they feel they safe.
- To maintain links and contact with pupils' peers in class as suitable for the individual.
- To provide a structured routine with clear boundaries to support pupils to feel safe.
- To reduce significant incidents when pupils may become distressed.
- To improve attendance for some pupils.
- To ensure that staff working in the ERP have the skills and training required in order to be effective.

Which children access the ERP?

The academy's ERP comprises of pupils already on the school roll who may have significant SEND needs and other pupils who have been taken in by the school, as requested by the Local Authority.

The identification of pupils to attend the Enhanced Resource Provision comes from a range of sources such as parents, class teachers, the academies' SENDCO and SLT.

The academy's ERP is predominantly aimed at pupils with social, emotional and mental health needs however, it will also consider supporting pupils with other social and communication needs, such as Autism.

Children who access the ERP will already have an Education, Health and Care Plan (EHCP) in place or be in the process of applying for one.

How does the ERP run?

The ERP at Croxby comprises of one dedicated key base (The Meerkat Classroom) and other satellite spaces in school, which form transition classrooms to support pupils in moving into a mainstream classroom. Where possible, pupils accessing the ERP are supported to transition into a mainstream classroom for at least part of their learning. Staff work closely with class teachers to ensure academic progress.

Adult support in the ERP is fluid and the pupils working in the room will work with different adults from this team at different points within the day. This enables pupils to build relationships with several key adults. Pupil from all ages within the school may access the ERP and this helps to develop the pupil's social skills. The amount of time that pupils spend in the ERP will be dependent on the needs of individual pupils.

Accessing the ERP will facilitate pupils to learn, understand and manage their emotions. They will develop their ability to set and achieve positive goals, feel and show empathy to others. Another important facet is the ability to establish and maintain positive relationships as well as developing the ability to make constructive choices about personal behaviour and social interactions.

Staff in the ERP

The room is led by an experienced teacher who is supported by a team of experienced Teaching Assistants. The school's SENDCo and other members of the SLT oversee the operational and strategic aspects of the provision.

Monitoring

In order to ensure that our Enhanced Resource Provision is having a positive impact on our pupils, the following is applied;

- Use of the Boxall Profile to identify areas of need regarding social and emotional aspects.
- Close liaison between class teachers and the nurture lead to ensure that learning provision is relevant, suitable and in line with pupils' peers.
- Provision in the Nurture Room is monitored as part of the whole academy monitoring and evaluation framework to ensure delivery is effective.
- Collection of digital evidence to record pupils' social and emotional achievements.
- Pupil Voice to gather children's views on the Enhanced Resource Provision.
- Parent Voice to gather parents' views on the impact of the Enhanced Resource Provision on their children.
- Weekly meetings between the lead nurture teacher and SENDCO.

Specialist Provision

Some children working in the ERP, may need to access additional provision and the school may implement the following for individuals where required:

- Mable online speech and language therapy
- Mental Health Support Worker
- Emotional Literacy Support Assistant (ELSA)
- Lego Therapy
- Social, Emotional and Mental Health (SEMH) intervention groups led by the LA's Educational Psychologists
- Inclusion Practitioner

Time in the ERP

Time spent in the ERP will differ according to the individual needs of our pupils, however for those pupils with the most significant needs the timings of their academy day may differ to other pupils attending the academy.

The academy day for these pupils will be a **9.00 am** start and a **2.30 pm** finish.

The purpose of this is that it will enable pupils to avoid the busiest times of the academy day (when all other pupils are arriving and leaving) in order to encourage a calm beginning and end to the day.

This will also enable key members of staff to meet and debrief ready for the next day, as well as providing time for training, planning and creating resources for individual pupils.

If you have any questions about the school's ERP, please don't hesitate to contact the academy's SENDCO (Clare Neighbour).
