

# THE LEANING TOWER OF PISA

## WHAT IS THE LEANING TOWER OF PISA?

The Leaning Tower of Pisa is a tall building in the city of Pisa, Italy. It was born, or built, in the year 1173. People all over the world visit it because it leans to one side.

## WHY DOES THE TOWER LEAN?

The tower leans because the ground underneath it is soft and uneven. The builders did not know the ground would cause the tower to tilt. Even though it leans, the tower is safe and does not fall.

## WHAT IS THE TOWER MADE OF?

The Leaning Tower of Pisa is made of white stone called marble. It has lots of arches and columns, which are tall, round posts that hold it up. It looks very pretty and special.

## WHY WAS THE TOWER BUILT?

The tower was built to be a bell tower for a nearby church. A bell tower is where large bells ring to call people to come and pray. It is part of a big group of beautiful buildings. Today, many people visit the Leaning Tower of Pisa. Some climb the stairs to the top to see the view of the city. Others take pictures of the tower to remember their visit. The Leaning Tower of Pisa is a unique and famous place that people love to see. It shows us how interesting and creative buildings can be.
