

FRANK LLOYD WRIGHT

WHO WAS FRANK LLOYD WRIGHT?

Frank Lloyd Wright was an architect, which means he designed buildings. He was born on 8 June 1867 in a town called Richland Centre in Wisconsin, USA. Frank Lloyd Wright designed over 1,000 buildings in his life. He wanted his work to inspire people and make them happy. His ideas about how to build with nature are still loved by many people today. Frank Lloyd Wright's designs showed that buildings can be both useful and beautiful, and he is remembered as one of the greatest architects in history.

DESIGNING SPECIAL BUILDINGS

He loved making buildings that looked beautiful and fit well with nature. Some of his designs had big windows and open spaces, so people could see the trees, sky, and rivers outside.

A FAMOUS HOUSE

One of his most famous houses is called Fallingwater. It is built over a waterfall, so you can hear the water flowing under the house. This made it feel like the house was part of nature.

BUILDINGS FOR EVERYONE

He designed many types of buildings, like houses, offices, and even churches. Each one was unique and showed his special style. People still visit his buildings today to see how amazing they are.
