

ALBERT SADACCA

EARLY LIFE

Albert Sadacca was born in London, England, on 27 July 1901. He grew up in a family that moved to the United States when he was a young boy. Albert lived in New York City, where his family ran a business selling wicker goods, such as baskets and furniture.

A BRIGHT IDEA

In the early 1900s, electric lights were just beginning to replace candles and oil lamps in homes. During Christmas, most people still used candles to decorate their trees, which was dangerous as they could easily start a fire. In 1917, at the age of 16, Albert had a brilliant idea. He suggested that his family's business could start making and selling safe electric Christmas lights instead of using candles.

THE BEGINNING OF ELECTRIC CHRISTMAS LIGHTS

Albert's family began producing electric Christmas lights, which were safer and much more colourful. These lights became very popular, as they allowed families to decorate their trees without the risk of fire. Albert's business grew quickly, and he helped make Christmas celebrations safer and more festive for everyone.

A LASTING LEGACY

Thanks to Albert's innovative thinking, electric Christmas lights became a popular tradition around the world. Today, millions of people enjoy decorating their homes and trees with colourful lights every year. His bright idea helped bring joy and safety to the festive season.

Albert Sadacca's contribution to Christmas celebrations reminds us that even small ideas can have a big impact on the world.

EXAMPLE QUESTIONS:

1. Where and when was Albert Sadacca born?
2. Why were electric Christmas lights safer than using candles?
3. What idea did Albert have in 1917, and how did it help people?
4. How did Albert make electric Christmas lights affordable for more families?
5. What impact did Albert's invention have on Christmas traditions around the world?
